

Expect More >

Manufacturing Services

Expect More from Your EMS Partner.

SMC is the regional manufacturer of choice for Printed Circuit Boards. We have a proven track record of program management; from engineering prototypes through production releases.

Our in-house development of test systems and test software, lean inventory management processes, and strong history with supplier networks, allows us to provide manufacturing services that exceed the expectations of our customers.

Expertise

The expertise we have in NPI (New Product Introduction), Supply Chain Management, Design for Manufacturability, Test Engineering and Quality Manufacturing Services will enable you to maximize your success, grow your business and focus on your customer's needs.

Product Knowledge

Our operations team is made up of highly skilled Process, Customer, and Test Engineers that have 30+ years of experience building technology through assemblies. We understand the rigorous technology requirements for each functional area and the demand for reliable, quality products.

Industries Served

- >> Heavy Equipment
- >> Medical
- >> Industrial Controls
- >> Transportation

- Teamwork is a condition of employment
- Practice continuous, creative improvement
- Delight our Customers

Services

- Prototyping
- NPI
- Test Engineering
- Value Engineering
- Program Management
- Supply Chain Management
- Logistics
- Repair

Capabilities

- Surface Mount
- Conformal Coating
- In Circuit Test
- Functional In Circuit Test
- Functional Test
- Automated Optical Inspection
- X-ray Inspection
- RoHs and Lead Processes Supported
- Aqueous & No Clean Flux Processes
