Manufacturing Services

## Creative Ideas for your System Integration needs.

SMC is the regional manufacturer of choice for Systems Integration. We provide sub assembly and final product assembly, testing, and fulfillment. Our services cover single piece manufacturing to thousands of items, from pocket size to pallet size

The SMC team uses collaborative assembly process review and test development for sustained, robust manufacturing. Along with this, our delivery strategies such as make to order, make to stock, Kanban & direct fulfillment, enable us to exceed customer requirements.

### Expertise

The expertise we have in NPI (New Product Introduction), Supply Chain Management, Design for Manufacturability, Test Engineering and Quality Manufacturing Services will enable you to maximize your success, grow your business and focus on your customer's needs.

### Product Knowledge

Our operations team is made up of highly skilled Process, Customer, and Test Engineers that have 30+ years of experience building technology through assemblies. We understand the rigorous technology requirements for each functional area and the demand for reliable, quality products.

### Industries Served
